Getting Started

Thank you for choosing Blackbaud Hosting Services! We provide the total database solution for your organization. You have the flexibility to access your data from any computer with an internet connection. We maintain the security and integrity of your data using the most up-to-date technology, and we perform all routine maintenance and support tasks.

This document guides you through getting started with Blackbaud Hosting Services, including navigating within the Blackbaud Hosting Services environment and performing routine administrative tasks in your Hosting Services database.

Installing the Citrix Client

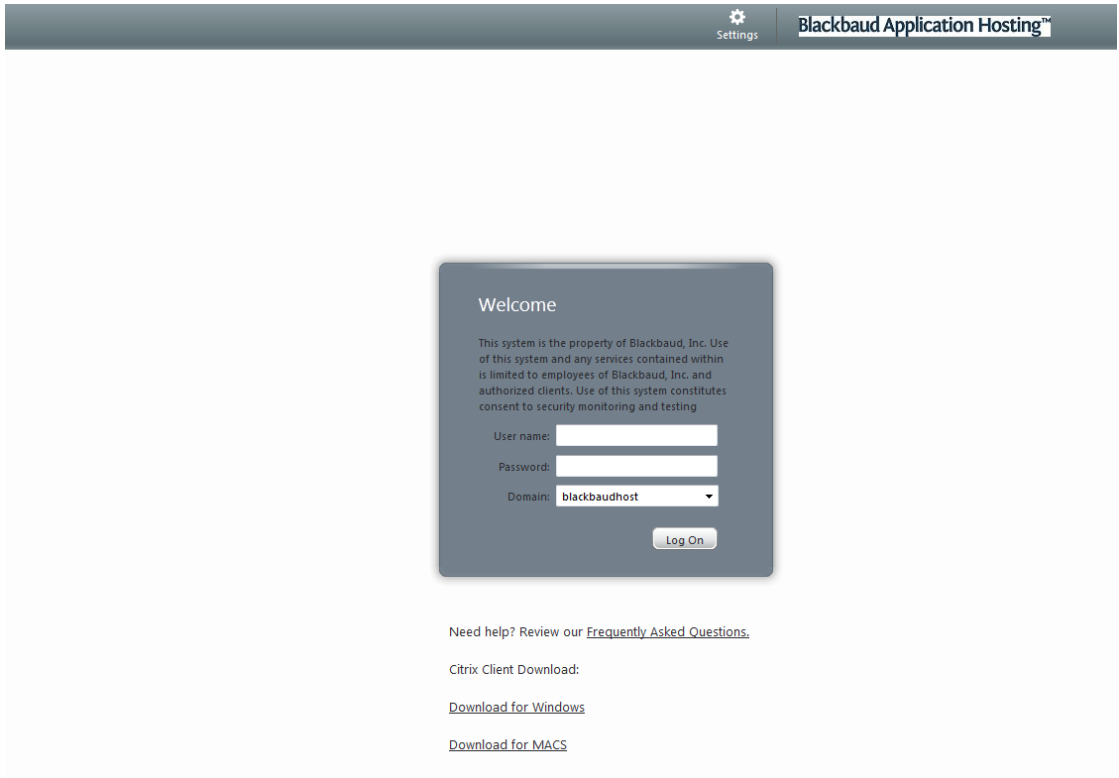

Before you use Blackbaud's Hosting software for the first time, you must install the Citrix MetaFrame Presentation Server client. This software allows you to remotely access your Blackbaud applications from the main server where they are stored.

➤ Download and install the Citrix client

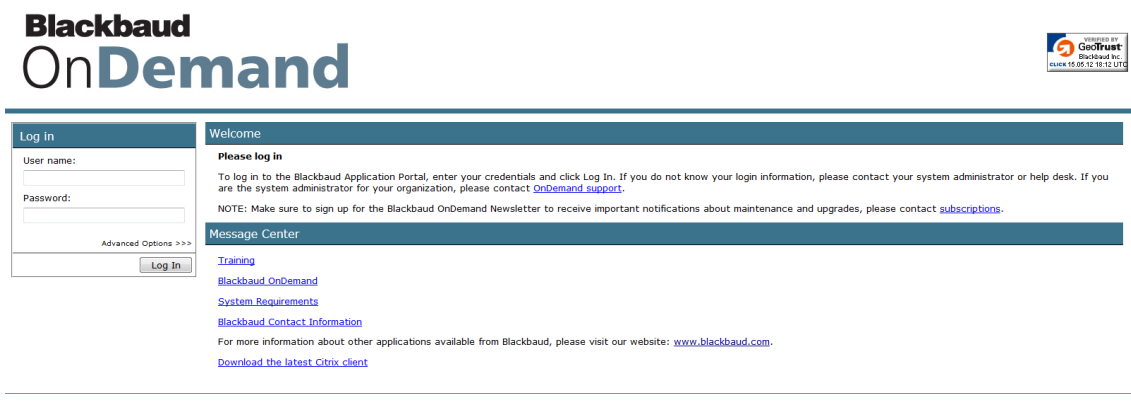

To Download and install the Citrix client:

1. Open your web browser and enter the URL for the Blackbaud Hosting Services Login Page.
 - For the Boston data center, enter <https://login2.blackbaudhosting.com>
 - For the Orange County data center, enter <https://login1.blackbaudhosting.com>.
 - For the Vancouver data center, enter <https://appsca.blackbaudondemand.com>.
2. When you log in to the Hosting web portal for the first time, you may be prompted to install the Citrix client. If this prompt appears, click **Yes** to run the installation.

For the **Boston and Orange County** data centers, you will see the following version of the login page:

For the **Vancouver** data center, you will see the following version of the login page:

If the installation prompt does not appear, perform these steps to manually install the Citrix client:

- 3. At the top of the page, click **Settings**.
- 4. Under the General section, click **Run Client Detection**. If you do not have the current version of the Citrix client, a prompt will appear to update the Citrix client.

5. Select License Agreement and click **Download**.
6. Follow the on screen prompts to install the client.

Accessing the Hosting Portal

In this section, we will discuss how to log in to the Blackbaud Hosting Services portal that grants access to your hosted applications.

➤ Log in to the Blackbaud Hosting Services web portal

To log in to the Blackbaud Hosting Services web portal:

1. Open your web browser and enter the URL for the Blackbaud Hosting Services Login Page.
 - For the Boston data center, enter <https://login2.blackbaudhosting.com>
 - For the Orange County data center, enter <https://login1.blackbaudhosting.com>.
 - For the Vancouver data center, enter <https://appsca.blackbaudondemand.com>.

Note: If you are using Internet Explorer, you can add this page to your Internet Explorer favorites. To do this, select **Add to Favorites** from the Favorites menu.

2. Enter your user name and password and click **Log In/Log On**.

Note: The Blackbaud Hosting Services administrator is the person at your organization with rights to manage user accounts and security group administrative tasks. If you are unsure of who your administrator is, please [create a Support case on Case Central](#).

- If you are a Blackbaud Hosting Services administrator, log in to the web portal with the user name and password given to you by Blackbaud or by another Blackbaud Hosting Services administrator from your organization.
- If you are a Blackbaud Hosting Services user, log in to the web portal with the user name and password given to you by your Blackbaud Hosting Services administrator.

Password Requirements

The Blackbaud Hosting Services portal adheres to a strict password policy to ensure your data is protected. Passwords can be set by Blackbaud Hosting Services administrators and must meet the following requirements:

- They cannot contain all or part of the user's account name.
- They must be at least eight characters in length.
- They must contain characters from three to four of the following categories:
 - English uppercase characters (A through Z)
 - English lowercase characters (a through z)
 - Base 10 digits (0 through 9)
 - Non-alphanumeric characters (e.g., !, \$, #, %)
- They cannot be one of the user's 10 previous passwords.
- They cannot contain hyphens.

Note: Blackbaud Hosting Services passwords are case-sensitive.

➤ Change a password

Passwords can be changed at any time by Blackbaud Hosting Services users. To change a password:

1. Open your web browser and enter the URL for the Blackbaud Hosting Services Login Page.
 - For the Boston data center, enter <https://login2.blackbaudhosting.com>
 - For the Orange County data center, enter <https://login1.blackbaudhosting.com>
 - For the Vancouver data center, enter <https://appsca.blackbaudondemand.com>
2. At the top of the page, click **Settings**.
3. Under the Password section, click **Change Password**.

4. Enter your old password and a new password. The password must meet Blackbaud Hosting Services requirements.

A screenshot of a 'Change Password' dialog box. At the top, there is a dark grey header bar. Below it, the title 'Change Password' is centered. A horizontal line separates the title from the main content. The main content starts with a line of text: 'Consult your help desk or corporate security policy to learn about your company's password guidelines.' Below this text are three input fields, each with a label to its left: 'Old password:', 'New password:', and 'Confirm password:'. At the bottom of the dialog box are two buttons: 'OK' and 'Cancel'.

5. Click **OK**. If the password change is successful, a confirmation message will appear.

A screenshot of a 'Change Password' confirmation dialog box. At the top, the title 'Change Password' is centered. A horizontal line separates the title from the main content. The main content consists of a single line of text: 'Your password has been changed.' Below this text is a single button labeled 'OK'.

6. To exit the Change Password screen, click **OK**.

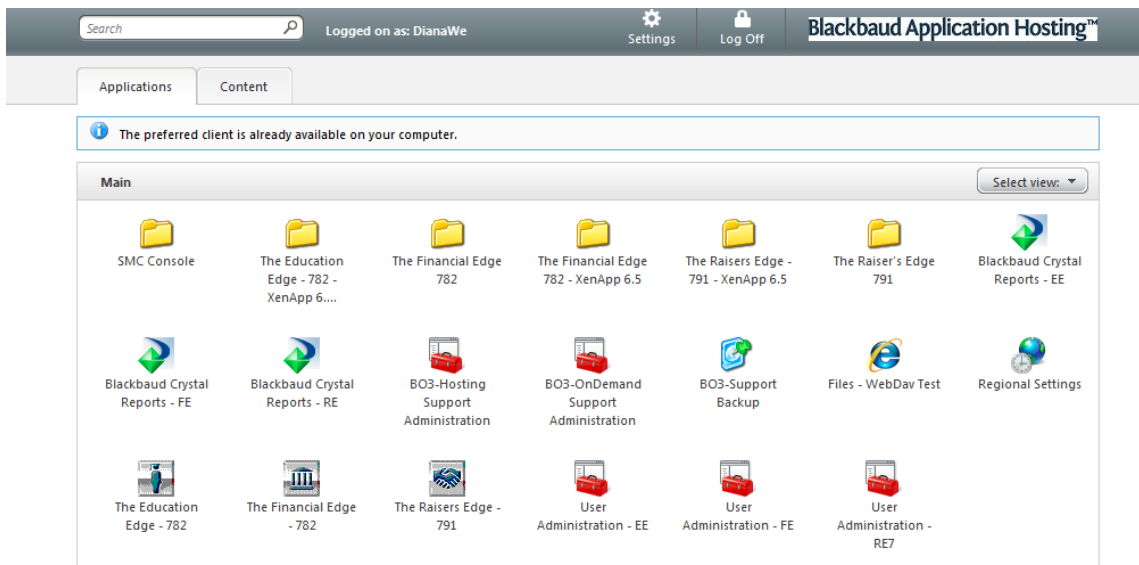

Navigating through Hosting Services

In this chapter, we will discuss how to navigate the Blackbaud Hosting Services portal including how to log in to hosted applications and how to use the Files folder.

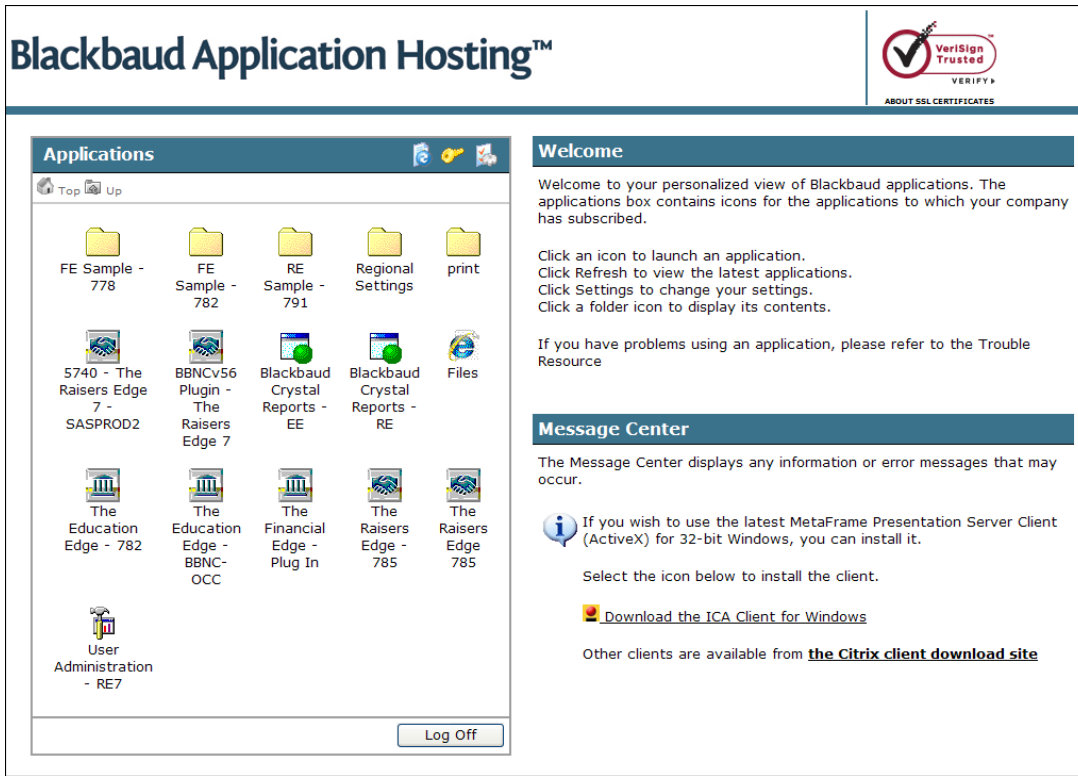

Access Hosted Applications

In this section, we will walk you through the process of logging in to your hosted applications through the Blackbaud Hosting Services portal. On the Blackbaud Hosting Services home page, you can access your hosted applications and files, as well as perform routine administrative tasks.

The **Boston** and **Orange County** Data Centers, share the the following version* of the home page:

For the **Vancouver** data center, the following version* of the home page appears:

***Note:** The icons that appear under the Applications section depend on what applications your organization has purchased. Your organization may not have all applications presented in the screenshots above.

To access Blackbaud Hosting Services applications:

1. Select an icon in the Applications frame (see screenshots above for the Applications Frames). The Log in prompt appears.

Username and passwords are unique to each application and may or may not be the same as the one used to access the Blackbaud Hosting Services web portal.

Users who employ a Windows operating system can elect to setup Windows authentication for use in the Hosting Services environment. Windows authentication allows the user to log in to a Blackbaud Hosting Services application with their Windows Security credentials. With this active the user only needs to enter their credentials once at the initial Windows log in screen.

Note: For more information about Windows authentication, please refer to knowledgebase solutions [BB66003](#) and [BB245612](#).

2. Enter your username and password and click **Ok**. The Citrix client connects to the Citrix server hosting the application, and the application launches.

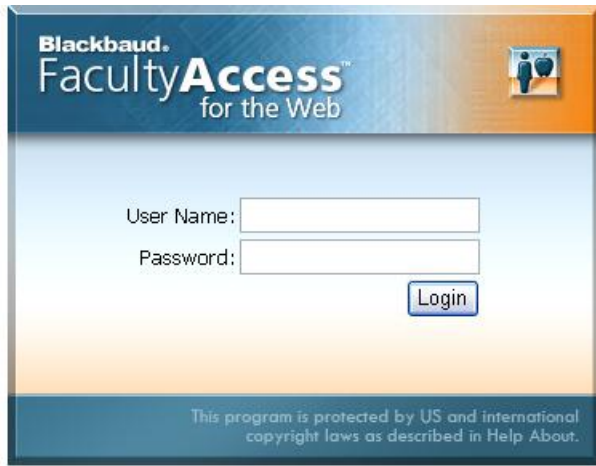

Access to Web Applications

To log in to **Faculty Access for the Web**:

1. Enter the web address that is specific to your organization's site ID. The login screen appears.

2. Enter your Blackbaud Hosting Services User name and Password and click **Ok**. The **Faculty Access for the Web** login screen appears.
3. Enter your **Faculty Access for the Web** User name and Password and click **Login**.

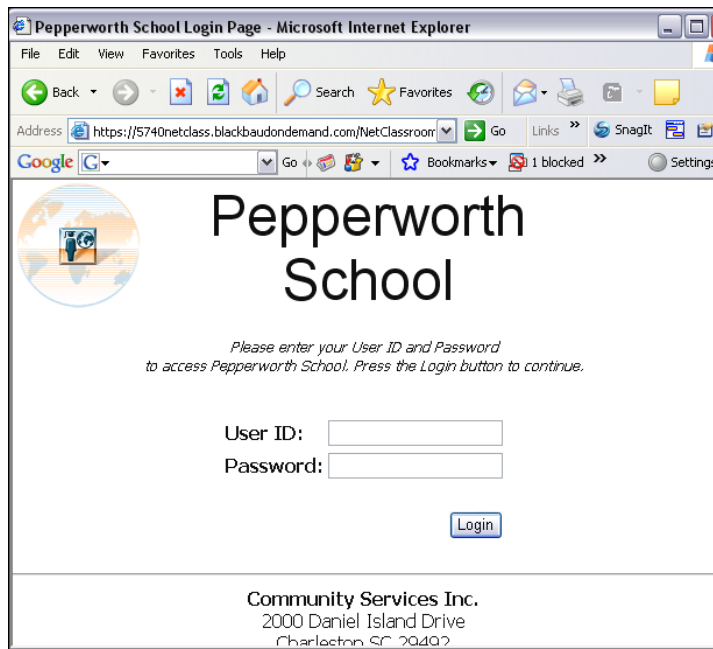

Note: For information about how to create **Faculty Access for the Web** user accounts, please refer to Knowledgebase solution [BB205197](#).

To log into **NetClassroom**:

1. Enter the web address that is specific to your organization's site ID. The login page appears.

2. Enter your **Net Classroom** User ID and Password and click **Login**.

Note: For information about how to access **NetClassroom** user accounts, please refer to Knowledgebase solution [BB64514](#).

Accessing the Files Folder

In this section, we will discuss how to use Blackbaud Hosting Services's Files Folder. The Files folder is a web-based, "thin client" application used to upload and download files to and from your hosted Blackbaud software. Your organization has its own Files folder in the hosted environment, and this folder is used to store and retrieve files when using your hosted applications.

For the **Boston** and **Orange County** data centers, the Files Folder uses *SFTP technology*.

For the **Vancouver** data center, the Files Folder uses a technology known as *WebDav*.

Any files that need to be accessed, imported, or exported from Blackbaud Hosting Services applications must first be placed in the Blackbaud Hosting Services Files folder. Files include but are not limited to:

- Imports
- Exports (including reports)
- Word documents
- Crystal reports (stored in a subfolder called "Custom Reports" in the Files Folder)
- File locations set in User Options in **The Raiser's Edge**
- Files that need to be embedded in the Media tab in **The Raiser's Edge**. Files *must be embedded*, not linked or you risk losing the media file.
- Any files generated from or interacting with hosted applications.

Because your organization has a limited amount of disk space available, the Files Folder should be considered a temporary storage facility for when you work with documents in the Blackbaud Hosting Services environment. When you are finished using a file, you should delete it or move it to your local machine to conserve storage.

[Click here](#) to watch a short training video on how to use the Files Folder.

Note: Default storage capacity for all data centers is 100MB per user. To purchase additional disk space for your documents, [create a Support case](#) through Case Central.

Files Folder- Boston and Orange County Data Centers

In this section, we will discuss how you can transfer files from your Blackbaud Hosting Services environment to your local workstation. All users access files and folders at the organization level. You can access the Files folder through the Files icon in the Blackbaud Hosting Services Portal or through the My Documents folder within a Blackbaud Hosting Services application, such as *The Raiser's Edge*, *The Financial Edge*, or *The Education Edge*.

➤ Access the Boston/Orange County Files folder

To access the Files folder, perform the following steps:

1. Open your web browser and enter the URL for the Blackbaud Hosting Services Login Page
 - For the Boston data center, enter <https://login2.blackbaudhosting.com>
 - For the Orange County data center, enter <https://login1.blackbaudhosting.com>
2. From the Applications section, select the Contents tab and click the Files icon.

Note: You can also skip steps 1 and 2, and reach the Files Folder directly by going to <https://files.blackbaudhosting.com>

3. Enter your Blackbaud Hosting Services username and password.

Note: For security reasons, do not select Remember my password if you are on a public computer

4. Click **Login**.
5. In the **Enter/SiteID** field, enter /[YourSiteID] and click **Go**.
6. Use the buttons at the top of the page to manage the files and folders.
7. If you prefer to use a third-party FTP client such as [FileZilla](#) to access the Files folder, use the following settings:
 - Host: files.blackbaudhosting.com
 - Connection (server) type:SFTP
 - Port: 22
 - Initial directory: your Site ID (if this option is available in your FTP client)
 - User name and password: Blackbaud Hosting Services credentials

8. Access the Files Folder within Hosted Applications.

For more information on how to use the Blackbaud Hosting Services Files Folder, please review Knowledgebase solution, [BB172995](#), which includes a short video demo.

Note: *FileZilla*, a third party FTP, is a popular choice for clients looking to improve their Files Folder experience. For more information, please visit Knowledgebase solution: [BB716509](#) In addition, we have created the following videos for your review:

Please [watch](#) this short video on how to use *FileZilla* for the Boston Files Folder.

Please [watch](#) this short video on how to use *FileZilla* the Orange County Files Folder.

Files Folder- Vancouver Data Center

To access the Vancouver files folder, configure *BitKinex* 3.1.1 for Windows. For instructions, go to <http://www.blackbaud.com/kb/index?page=content&id=BB707907>.

Note: We provide links to third-party websites in an effort to help you resolve your issue. We are not responsible for the information on third-party websites, and we cannot assist in implementing the solutions on these websites.

Secure Share Group and Secure Folders

For members of the Secure Share group, Secure folders are also be available. Only members of the Secure Share group can view these folders. There are separate folders for each hosted application, and they are distinguished by a suffix of “_SEC.”

Note: For more information about the Secure Share group and other user groups available for Blackbaud Hosting Services users, see the Blackbaud Hosting Services Administration Guide.
